

AMERICAN ENVIRONMENTAL PRODUCTS, INC.

Manufacturer of SUN-A-LUX®, SUNWAVE®, SAD-LITE®, GLAD LIGHT™, BLUE-LUX™, and GLOW-LUX™
www.sunalite.com

Dear Glad-Light™ Desk Lamp Owner,

Congratulations and thank you for choosing American Environmental Products Glad-Light™ Desk Lamp Combo. You have just received the most cutting-edge in Full Spectrum and Blue-Lux™ technology.

Your Combo Lamp comes complete with two (2) bulbs.

The bulb that is currently installed in your Combo Desk Lamp is the FS-PL-13. This bulb provides full-spectrum lighting, which provides a glare-free and comfortable reading environment, reducing eye fatigue. You can use this bulb anytime.

The additional bulb is a BL-PL-13, which has the new exclusive Blue-Lux™ technology. This bulb can be used to counteract the affects of Seasonal Affective Disorder, also known as the winter blues, winter depression or seasonal depression. Healthcare professionals recommend using this bulb only in the mornings. Be aware that use of the Blue-Lux™ bulb in the afternoon or evenings can change your circadian cycle and interrupt in your sleep patterns.

For further information on Melatonin Production and Circadian Rhythms, read the article titled *Scientists Discover Key to Melatonin Production and Regulation of Circadian Rhythms* found on our web site www.sunalite.com.

Note: When removing bulbs, please make sure the bulb is cool to the touch and to protect the end of the bulb as they may pop out rather suddenly. American Environmental Products, Inc is not responsible for breakage.

Sincerely,

The American Environmental Products, Inc. Crew
